Office Action Summary

Art Unit: 1774

DETAILED ACTION

1. Claims 1-18 are rejected under 35 U.S.C. (first paragraph).

The claims refer to dyes having a single color. The disclosure, however, is limited to dye precursors which are colorless.

2. Claims 7-10, 12, 14-16 and 18 are rejected under 35 U.S.C. 112 (second paragraph) as being indefinite.

These claims refer to leuco pigments which are dyes. Dyes and pigments are distinct materials (i.e., dyes are soluble and pigments are not).

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1774

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 17 and 18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6,13~~9~~914 or claims 1-26 of U.S. Patent No. 6,161,971. Although the conflicting claims are not identical, they are not patentably distinct from each other because one of ordinary skill in this art would recognize that each of the recited parameters would affect the property of heat transfer. Heat-transfer in a thermal-sensitive color-developing layer constitutes an art-recognized result-effective parameter..
